RE: Proposed Security System PLC Upgrade

Major:

Unique Security specializes in the integration, installation and maintenance of security systems and equipment for the corrections marketplace with a focus on system replacement and upgrades. The average experience of USI's principle the staff is over 35 years each in the corrections market ranging from design, manufacturing, installation and maintenance of security electronic systems and equipment.

USI's current customer base in Georgia, where we are under contract to provide maintenance and/or upgrade services includes the detention facilities of Carroll, Gwinnett and Muscogee counties. As with Rockdale, the core of their security control systems are based on the PLC equipment manufactured by Omron and the Aveva/Wonderware Intouch software package. Our experience with these core components, date back 34 years to 1991.

As you may be aware, USI has been supporting the Rockdale County GA Jail the past year in the service and maintenance of the Programmable Logic Controls (PLC) and the Officer Touchscreen Control Stations. It is our understanding that our involvement was due to lack of or no response from the previously contracted parties. Over the past year, in support of the facility, USI has implemented some remedial changes and equipment changes in order to restore system operation. At this time, in our opinion, we have a solid understanding and knowledge of the security system on how it is integrated, programmed and configured.

Due to the complexity of the equipment and integration of the systems, failure to properly configure and deploy the new PLC equipment, software and communication drivers, may yield an unreliable and unstable system. Detailed knowledge of the current systems, the configuration of the integration and the means and methods employed must be adhered to when replacing or upgrading system hardware and software. Failure to properly schedule and sequence activities, could easily lead to extended system downtime or catastrophic security events.

Should you have any questions or would like to discuss further, please contact us at your convenience.

Sincerely,

Lonnie Mosler
